# SUN2000-12/15/17/20/25KTL-M5 Smart PV Controller

Al Powered Arcing Protection

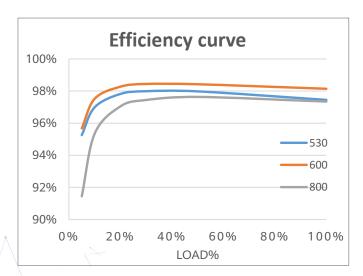

### **Higher Yields**

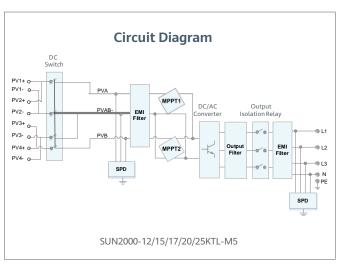

Up to 30% More Energy with Optimizer

#### **Flexible Communication**

WLAN, Fast Ethernet, 4G Communication Supported

<sup>\*1</sup> Inverter max input PV power is 40,000 Wp when long strings are designed and fully connected with SUN2000-450W-P power optimizers.

\*2 The maximum input voltage is the upper limit of the DC voltage. Any higher input DC voltage would probably damage inverter.

\*3 Any DC input voltage beyond the operating voltage range may result in inverter improper operating.

\*4 SUN2000-12~20KTL-M2 raises potential between PV- and ground to above zero through integrated PID recovery function to recover module degradation from PID. Supported module types include: P-type (mono, poly)
